

Exide Technologies (www.exide.com) is a global provider of stored electrical energy solutions—batteries and associated equipment and services for transportation and industrial markets. With 127 years of industry experience and operating in more than 80 countries, Exide produces and recycles a broad range of products that keep customers and their businesses powering forward. Leading car, truck and lift truck manufacturers trust Exide as an original equipment supplier, and Exide serves the transportation and industrial aftermarket through a comprehensive portfolio of products and services. The Company’s extensive sales, distribution and service network provides flexibility and quality for an exceptional customer experience.

The Exide **Transportation** business manufactures and markets starting, deep-cycle, and micro-hybrid batteries for automotive, light and heavy-duty truck, agricultural, marine, military, powersport, and other specialty applications. Exide serves the global transportation marketplace with successful and well-known product offerings and brands, along with battery diagnostic equipment and charging systems.

Exide serves the **Industrial Power** markets with its **GNB®-branded** efficient energy storage systems for both **Motive Power** and **Network Power** customers. **Motive Power** applications include materials handling (power for lift trucks, airside assistance vehicles, and automatic guided vehicles); cleaning machines; railroads; military and mining vehicles; and other commercial electric vehicles. **Network Power** installations include standby power for electric utilities; telecommunications systems; alarm/security systems; renewable energy systems; railway systems; uninterruptible power supply (UPS); and defense industry equipment.

Exide’s **innovative technologies and advanced /premium products** include Absorbed Glass Mat (AGM) and Enhanced Flooded Batteries (EFB) for start-stop and energy recuperation in automotive applications, along with flooded and VRLA (AGM and GEL) products, market leading motive power tubular products and smart charging systems for industrial applications.

At Exide Technologies, ***It All Starts Now***. History and scale, combined with a start-up mentality, make Exide the faster, more nimble, more innovative, more digital, and more responsive alternative for customers who want more than simply a battery supplier. Exide is ***“the 127 Year Old Start-Up”***, and the Company is moving forward—bringing the energy of the “new Exide” to customers around the world.
